

SHORT DESCRIPTION OF THE ABSTRACT PRESENTED AT ICASA IN ABIDJAN, CÔTE D'IVOIRE

The abstract was prepared in 2017 for ICASA 2017 by Daniel Adams from the Care and Support Unit of international centre for advocacy on right to health (ICARH) and was approved same year. A poster presentation was made on it at the conference.

It centres on the how the HIV prevention programmes in Nigerian prisons can affect the life of the prison inmates and also in the long run reduce the prevalence of HIV in Nigeria. It provides a level of data from a survey carried out in some prisons across the 36 states of Nigeria and how it relates to HIV. This data further points the need for something or more to be done in Nigerian prisons to support the fight against HIV/AIDS in the country.
